

01 - DVR 4 DVD+RW USB + WEBSERVER

Facilities include "EZRecord" - which is the fastest standard Record setup facility available with the User simply entering the number of days of recording required. The DVR will display the picture Quality and Frame / Field (PPS) record rate and this can be altered if higher quality or a higher refresh rate is required. When altered the DVR will immediately show the revised number of recording days. Nothing could be simpler.

"EZBurn" is the new simple method to Burn or Copy recorded incidents to the inbuilt DVD+RW or to a USB Memory Stick - with just 2 Front Buttons to press. In addition the inbuilt Webserver optimises viewing on a Network or off-site via the Internet.

There is a Main, Call (Spot) and VGA Monitor output. We include a IR Remote Control and offer a Keyboard and Joystick RS485 Remote Control options for DVR and Dome operation at a distance. This is the ideal model for sites with 1 ~ 4 cameras.

Key Features

- Optimised H264HR Compression.
- Microsoft Certified Digital Certificate.
- Internal Hard Drive capacity up to 2TB.
- Built-in DVD Burner.
- Main Monitor Output.
