

SG II RF Dual-Swept System Complete

RF Systems

After the overwhelming success of the SG1 mono system we are proud to introduce a new addition to the SG Series. The SG2 two antenna system has the same attractive design as the successful SG1 mono 8.2 system. Both systems share the same design using aluminium profiles in combination with plexiglass which fits perfectly into any modern shop interior.

The superior electronics of the SG 2 employ moving field detection in combination with a four loop transmitter and 4 loop receiver. The SG2 offers a true wide aisle solution and is ideal for retailers using RF paper labels. Both the SG1 and SG2 offer the possibility to insert advertising panels as shown in the pictures. Mentioned advertising panels can be inserted and removed within seconds. The SG series are compatible with all existing 8.2 MHz labels and tags.

Specifications

Dimensions:	37.4 x 167.0 x 4.2 cm
Swept Technology:	8.2 MHz
Moving Fields:	4 Loops
Detection Range:	Up to 1,60 m (When using 4x4 PL) Up to 1,70 m (When using 5x5 PL) Up to 2,00 m (When using hard tags, 5cm)
Power Supply:	110 / 230 volt
